

Admin Users (link test)

- ✓ TODO: Format the below article so it will store as json/markdown and be read into the wiki
- TODO: Add screenshots
- TODO: Ensure that ONLY admin users can see this wiki page

Admin Users 🧐

You have been granted elevated permissions and have access to the admin side of Bronson - here's what's included.

Terminal

At the bottom of the screen, you will notice a large terminal window. As of right now, this is unused and is a placeholder for future development...

You can hide/show this terminal window by pressing the Bronson logo in the top left, and pressing "Hide Terminal" to minimize the window.

Tickex

You now have access to a new button, the "*Dismiss All*" Button.

This button will dismiss all tickets that are highlighted in yellow.

Please note: this action is a global action and will reflect for all users. Only use it if you know what you're doing with it. 😊

Admin Tools

Near the top right of the screen, you'll notice a new *tool tab* which includes the new tools

- Message Editor: Where you can edit the current message displayed on the dashboard for all technicians.
- Schedule Editor: Where an admin can add/remove/adjust the schedules of individual

student technicians.

- Database Editor: This editor controls properties of individual rooms on campus that Bronson tracks. Device counts, general pool rooms, room check periods, and offline rooms.
- Alias Editor: Naming across different web apps has been a problem. Here Bronson can assimilate naming conventions across LSM, 25Live, and other services linked to Bronson.
- Diagnostics:
- Thread Editor: Bronson automatically runs tools independently of each other (things like checkerboard, tickex, jacknet, etc...). Here you can adjust how often the run, and can even request a tool to run right now.
